LEONA™ SN11B

Reliable Insulation for Rigid Busbar Systems

LEONA™ SN11B

LEONA™ SN11B is a halogen-free, flame-retardant PA66 alloy that provides excellent electrical insulation, mechanical strength, and thermal stability for rigid busbars in EV battery systems.

Benefits

- High strength
- Long-term heat resistance (RTI Elec. 130°C)
- Flame resistance (V-0, non-halogen)
- Tracking resistance (CTI PLC 0, 600V)
