

AsahiKASEI

XYRON™ mPPE XP650 / DG040

For Gap Waveguide Slot Array Antennas

XYRON™ mPPE XP650 / DG040

This modified polyphenylene ether enables metal replacement & cost reduction in slotted waveguide array antennas for ADAS applications.

Benefits

- High dimensional stability
- Excellent dielectric properties (low DK/low Df)
- Excellent platability enables metal replacement
- Processing cost reduction by omitting milling process
